INTRODUCTION.

BY

Josiah Hayden Drummond, L L. D.

A history of the origin and growth of our system of family names would be in the highest degree interesting but would be of too great length to be given here. But some points will not be out of place in connection with a list of names changed by legal enactment.

It is probable that originally names were, or were intended to be, significant. It is certain that many of the names now in use originated in the means adopted to distinguish one man from another bearing the same name. Within comparatively a few years so many McIvors from Scotland settled in one neighborhood that they were designated by their occupation. One McIvor was a mason and in a few years he was called and known by the name, Mason; and his children used Mason as their family name, but also using McIvor as a middle name.

In Bible times, especially among the Israelites, there was but one name, and what are now family names were unknown; the same was substantially true of the Greeks, Egyptians and other peoples. But the Romans had a regular and somewhat complicated system; usually there were three names, the individual or given name, the tribe name and the family name. Our present English and American system of given and family names is of comparatively recent origin. At the beginning of the twelfth century the practice of giving a person two names and transmitting his second name to his children had not been fully established. As already stated many family names grew out of occupations, others out of localities; and circumstances, almost infinite in variety, gave rise to names which were destined to be transmitted from generation to generation for centuries. In this country foreign and Indian names have been Americanized, and while frequently something near the original pronunciation has been preserved the written form would never be recognized as the original. The use of middle names was quite rare in this country before 1800. It has been claimed that their use was greatly increased after the Revolution by naming children for George Wash-

ington and other heroes of that time.

Formerly, especially in England, the baptismal name, or the one originally given a child followed him or her through life, except as a woman's name was changed by marriage. Many acts done by one under a false name were void, and, therefore, the use of an assumed name came very near being a crime.

It was therefore deemed necessary to have the sanction of the law if a man wished to change his name.

While a full examination of the early statutes of our Mother Commonwealth has not been made, it is believed that the earliest change of name in Massachusetts by legislative act was in 1781. After that date changes were not infrequent, so that when Maine became a State the practise was in full operation and at almost every session of our legislature till 1876, more or less names were changed by it. No other tribunal could give that authority, except that the court in granting a divorce could authorize a woman to resume her maiden name.

In 1876 Probate Courts were authorized upon petition to change names, and since then the legislature has been relieved of that burden.

One curious thing has been noticed. In very many cases the new name contains a middle letter with a period after it, indicating that the letter is the initial of a middle name. But the legal name is the one written in the statute just as it is there, and the only middle name is the letter! If a man has his name changed to John J. Smith, that is the whole of his name and the statute no more authorizes him to call himself John Jones Smith than it does to call himself Jones John Smith.

However, the strictness of the old law in relation to names has been very much relaxed. Any name that a man uses as his name in any transaction binds him as fully as if he used his real name. Even if a man changes his name the law imposes no penalty and many cases are known in which a person, who was called by his middle name as originally given, has reversed his two names rather than "part his name in the middle." Still the use of an assumed name is rightly held in the community to be evidence of an attempt to conceal identity.

The reprehensible practice of using only initials in one's autograph may have had a similar origin, but in spite of that it has increased until it has become a nuisance not only to historians and genealogists, but also to business men.
